

Dashboard:

- 1. Last completed module
- 2. Next module to attend
- 3. Last score (MS, OB, II, T)
 - a. Can show last attempted
 - b. No. of reattempts
- 4. Time spent on P3, P4, T1, T2
 - a. Overall for each
 - b. No. of reattempts
- 5. Total training hours
- 6. Practice streak - weekly
- 7. Learning path progress

“Your fetal head plane acquisition accuracy improved from 62% → 81% over 5 sessions. However, you are 20% below expert benchmark in probe stability. Recommended: Repeat guided practice + 2 abnormal cases.”

|  Trainee Name | Level: Intermediate | Cohort Rank: 32% |

|  Readiness: 74% |  Weekly Progress: +6% |
|  Practice Time: 12h |  Modules Completed: 8/12 |

|  Performance Metrics |

Accuracy	78% (↑ from 70%)
Time per Task	4.2 min (↓ improved)
Error Rate	18% (↓)
Consistency	Medium

 Trend Graph (Accuracy vs Attempts)

|  Skill Competency Overview |

| Skill | Level | Trend |

Probe Handling	 Intermediate	↑
Plane Acquisition	 Advanced	↑↑
Fetal Biometry	 Intermediate	→

| Anatomy Identification | ● Beginner | ↓ |

| 🔍 Last Session Breakdown|

| Module: Biometry- AC, P3

| ✓ Correct Plane Acquired |

| ✗ Landmark Misidentified |

| ✗ Measurement Offset: +2.3 mm |

| 💡 Feedback: |

| "Adjust probe tilt slightly inferiorly" |

| [Replay Attempt] [Practice Again] |

| 🏆 Benchmarking |

| Your Accuracy: 78% |

| Cohort Average: 72% |

| Expert Benchmark: 90% |

| Percentile Rank: Top 35% |

Skill Gap + Recommendations (Action Engine)

| 🎯 Focus Areas |

| ● Anatomy Identification |

| → Accuracy: 52% |

| → Recommendation: |

| - Repeat Module 2 |

| - Practice 3 abnormal cases |

| ● Fetal Biometry |

| → Improve measurement precision |

💡 **Design Philosophy (Important for Your Product)**

- **Top → Insight**
- **Middle → Diagnosis**
- **Bottom → Action**

This ensures:

- Trainee understands current state
- Knows what's wrong
- Knows what to do next
